

## **CUBA WILL WIN, CUBA IS NOT ALONE!!!**

The Cuban Institute of Friendship with the Peoples has condemned for years the implementation of lists and unilateral coercive measures designed by the U.S. government, which seeks to force a social and political change by subduing our people through economic warfare.

On January 14th, we expressed our appreciation to activists in the U.S. and around the world for their ongoing denunciation to achieve the exclusion of Cuba from the List of State Sponsors of Terrorism. **The support of the global solidarity movement was decisive in facing all of the damages caused by this comprehensive and criminal system of sanctions.**

The policy towards Cuba of successive U.S. administrations has been unequivocally imperialist. It is not surprising that a few hours after taking office, its new president Donald Trump announced the reestablishment of the measures that his predecessor eliminated a week ago, through a late Executive Order.

Today, we are once again witnessing the destruction of the truth by a political vendetta that hides a big business with millions of dollars in funds designated to profiteers from dozens of organizations in Miami, who profit from anti-Cuban politicking. The discredit of American institutions is total. The media farces of condemnation of Cuba, under any pretext, have been exposed.

In the same way that the Cuban people knew how to rise and resist the policy of maximum pressure applied since 2019, they will do so again with the firmness and motivation to defend our independence. The clean record of our nation in the fight against terrorism will prevail as our best weapon of struggle.

Millions of voices will rise against the abuse and injustice in the world. **Despite Trump's arrogance and lies and in spite of his disrespect for the norms and institutions of his own country, CUBA WILL WIN!**

Cuban Institute of Friendship with the Peoples (ICAP)
